

Solve each Equation. Show each step.

1)

$$\frac{5}{4}x - 2 = 8$$

2)

$$-\frac{3}{4}x + 12 = -9$$

3)

$$\frac{2}{3}x + 15 = 19$$

4)

$$10 - \frac{4}{3}x = -10$$

5)

$$\frac{1}{8}x + 9 = 6$$

6)

$$5 - \frac{4}{3}x + 7 = 4$$
